
Below is a transcript of the live *Radical Wealth Summit*. If you would like to watch the video, click here.

"My David vs. Goliath investing strategy is the easiest, quickest way I know to make TEN TIMES your money — enough to turn $10,000 into a windfall $100,000."

—Jim Pearce, Director of Research, Investing Daily

Hello, I'm Brenton Flynn, the publisher at *Investing Daily*. I want to personally welcome you to this exclusive webinar.

Today we're unveiling one of the most exciting… innovative… and lucrative investment strategies ever developed…

Designed specifically to create extreme wealth.

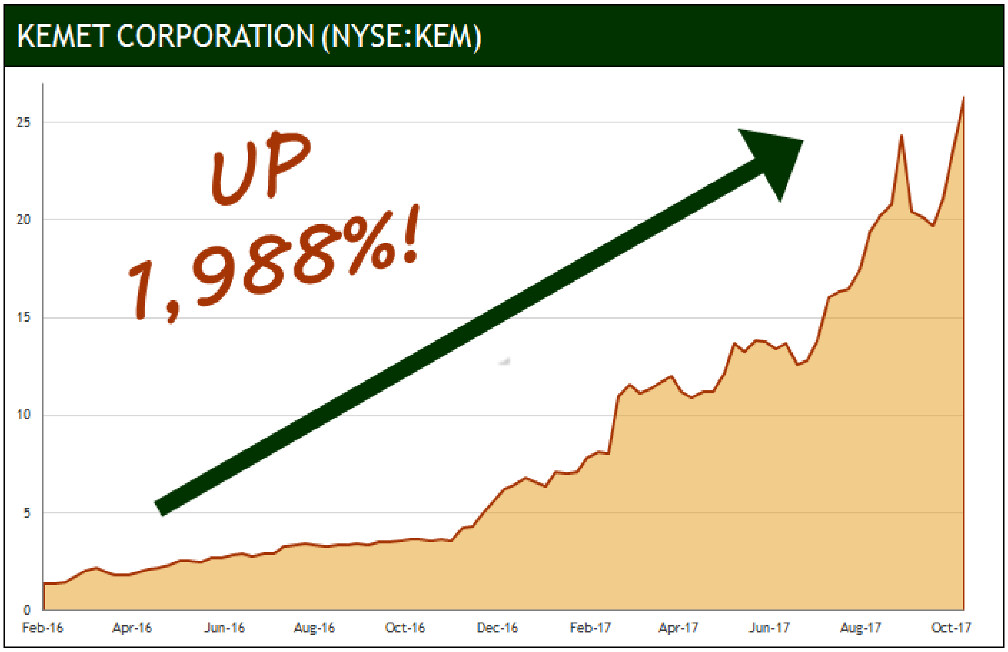
We're calling this our ***Radical Wealth Summit.***

The information you're about to receive is essentially a blueprint you could use starting right now to consistently rake in 10-fold gains — *without taking big risks with your money*.

Using the same methods we've discovered while researching and developing this summit…

We'll reveal *exactly* how you could achieve life-changing returns like…

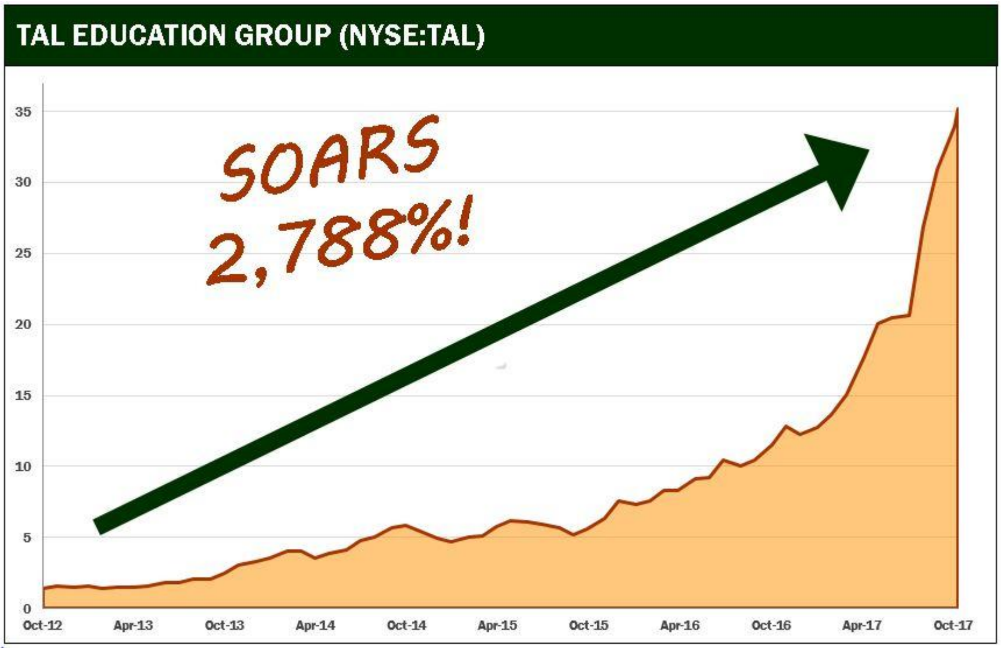
The 1,988% gain investors earned on Kemet Corporation… that's almost 20 times your money in just 18 months.



We'll discuss the breakthrough strategy that could have helped you earn a 2,476% gain on LendingTree…

Plus, we'll reveal the techniques that could have led you to a little-known company — TAL Education Group — that wasn't on hardly *any* Wall Street analysts' radar… but was *still* primed for an extraordinary breakout.

In just a few short years, TAL shot up 2,788%… turning every $10,000 invested into **over a quarter million dollars**.



In just a moment, I'll give you the details on how you could use these *Radical Wealth* techniques to start bagging some of the biggest profits the markets have to offer.

But first, I want to introduce one of the creators of the *Radical Wealth Summit*, **Jim Pearce**.

Jim is Director of Research at Investing Daily, overseeing the work of our entire analyst team. He's also Chief Investment Strategist for *Personal Finance*, our flagship publication.

Jim is going to take us step-by-step through exactly how to find those stocks that quickly skyrocket 1,000% or more.

Brenton: Thanks for joining us today, Jim.

Jim: My pleasure, glad to be here, Brenton.

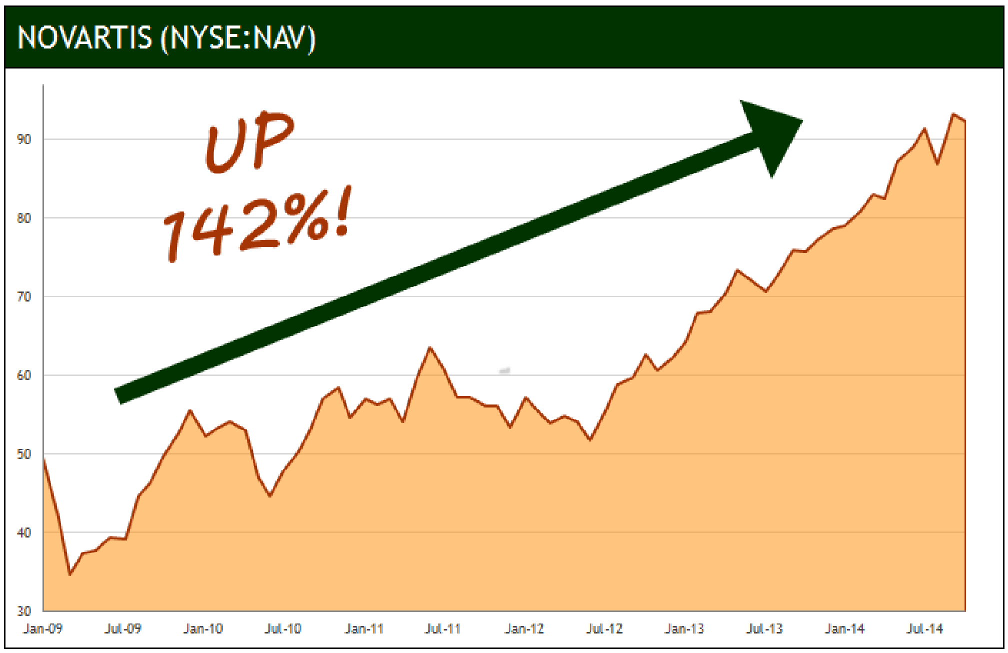
Brenton: Jim, you had mentioned to me earlier that the catalyst for the *Radical Wealth Summit* actually came from your readers at *Personal Finance*. Can you tell us more about that?

Jim: Well, it began a couple years back when we started getting questions from some of our subscribers who were interested in pursuing a more aggressive form of investing.

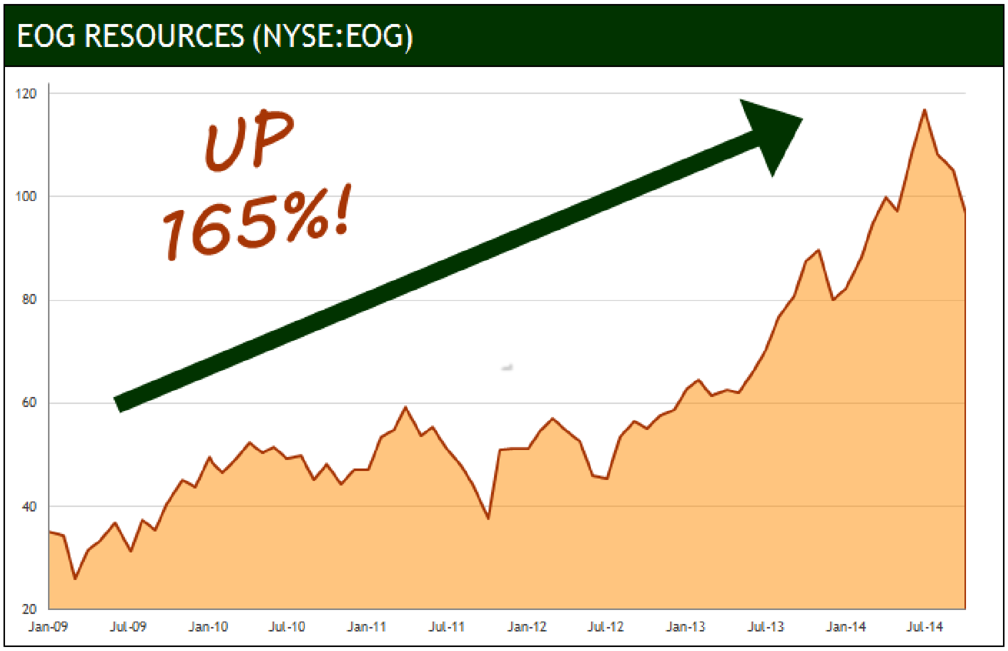
Many of these folks had been investing side-by-side with us for years. And since we've been publishing *Personal Finance* for over 42 years, it's safe to say some of these investors have been with us for decades.

These people mentioned they've been taking our recommendations and riding them to stellar profits…

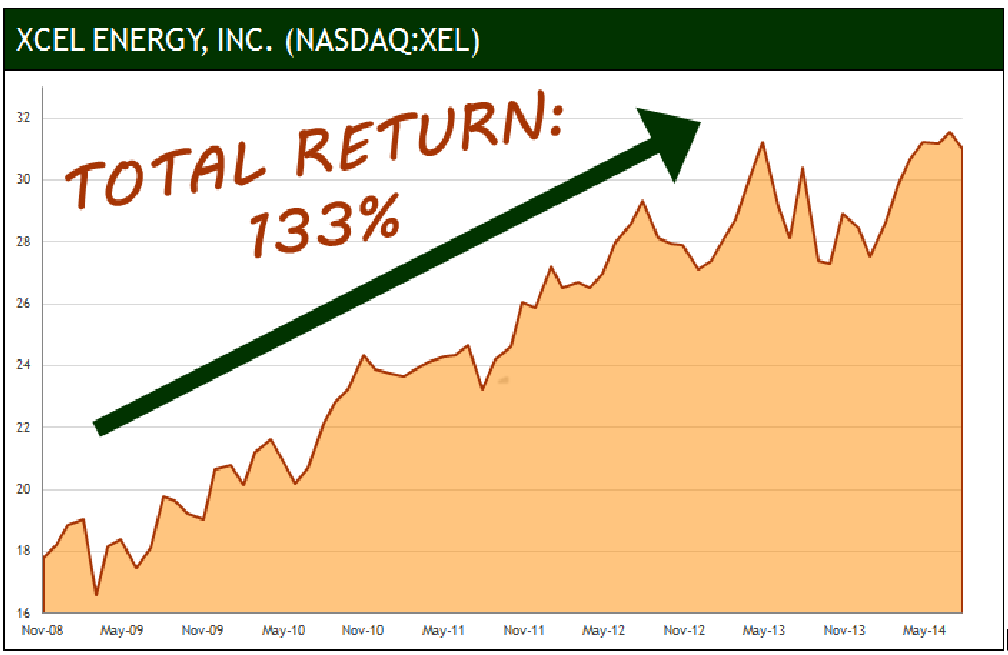
Like the 142% return they earned with our Novartis recommendation…



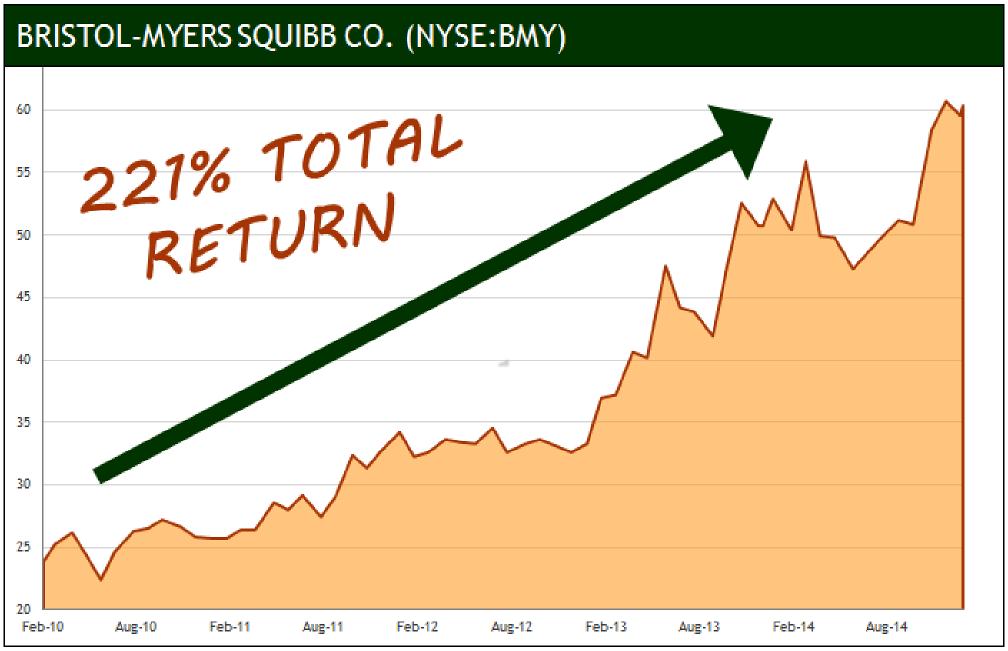
And the 165% total return from oil and gas company EOG Resources…



Or the 133% they bagged when they followed our Xcel Energy recommendation…



Not to mention the astounding 221% total return our subscribers racked up with our Bristol-Myers Squibb trade…

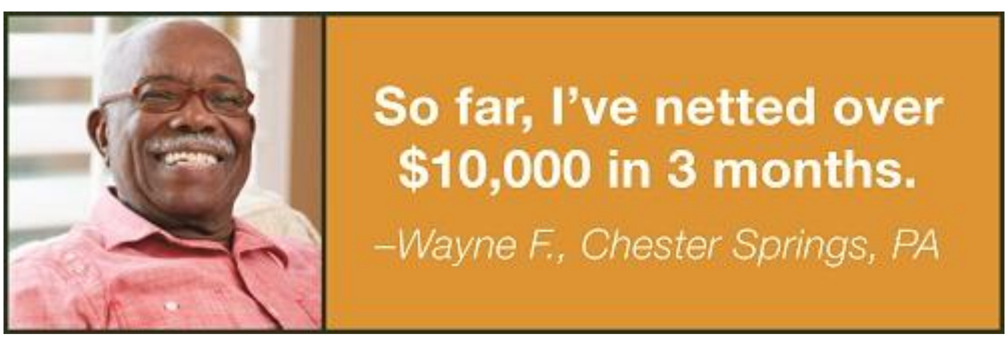


That last winner is enough to turn a small grubstake of $5,000 into $16,050… or $7,500 into $24,075… or $10,000 into an outstanding $32,100.

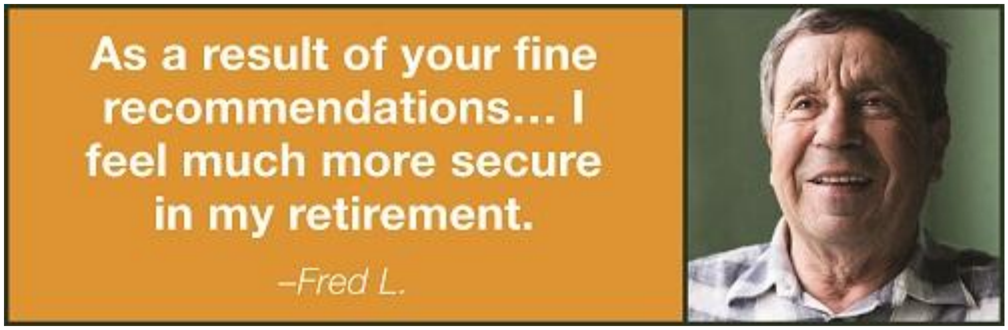
Brenton: Those are some fabulous returns you've earned, Jim.

In fact, our email inbox has been flooded over the years with letters we've received from grateful subscribers from services you oversee.

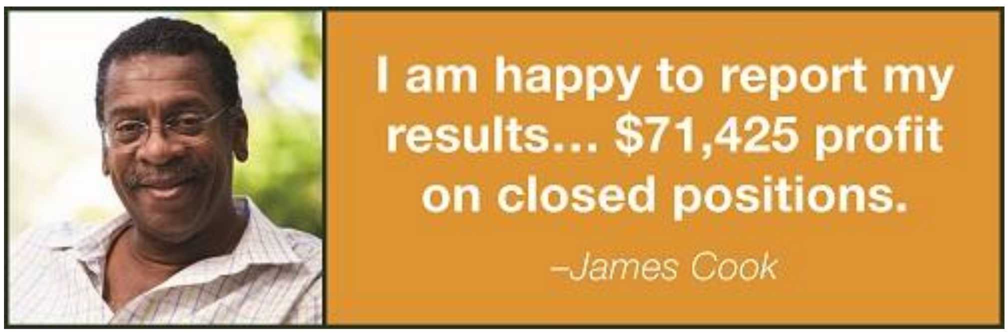
For example, Wayne F. from Chester Springs, Pennsylvania wrote:



And Fred L. recently told us:



While James Cook wrote in to say:

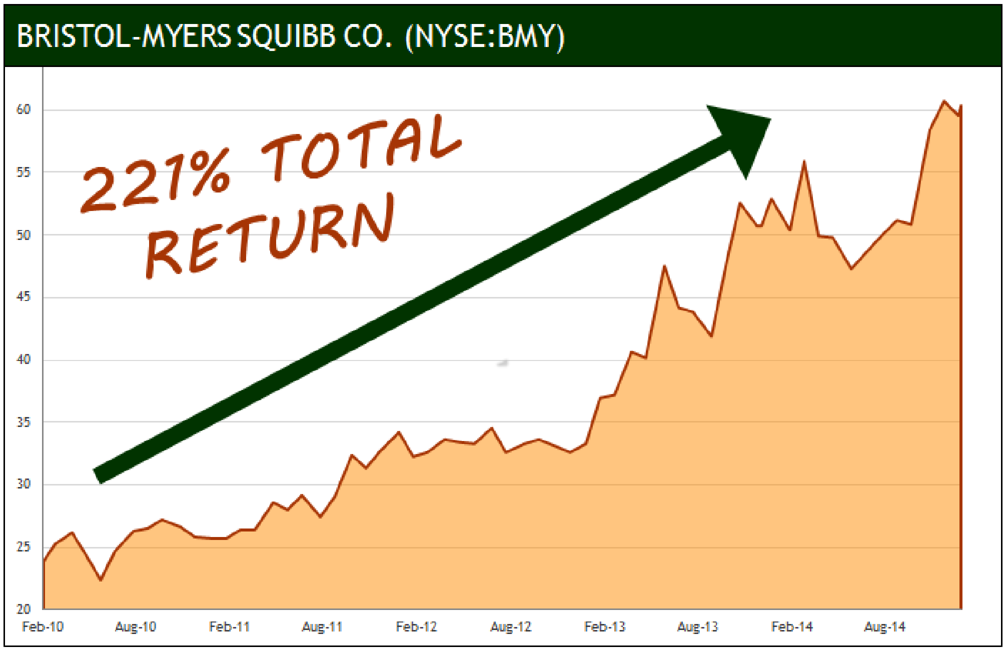


Jim: There's no doubt these are *great* results, Brenton. Still, there was an important issue many of our readers wanted us to address regarding our winning recommendations.

Let me show you what they were concerned about. Here's that Bristol-Myers trade again…

Take a look at the time period we're talking about. Notice anything?

Brenton: Well, it looks like Bristol-Myers skyrocketed 221% over about 5 years.



Jim: That's right. It's exactly the kind of company we recommend for readers at *Personal Finance,* where our team focuses on safe gains over the long haul.

Basically, our mindset for these kinds of investments is slow and steady wins the race.

But now, some of our readers were telling us they were ready to kick it up a notch.

These folks wanted a way they could achieve outsized profits. We're talking about well beyond triple digit gains.

They wanted to multiply their money by ten… fifteen… even twenty times or more…

They wanted gains of 1,000% or higher.

Plus, they wanted to do it A LOT QUICKER. Not over 4 or 5 or 6 years… but in one or two years MAXIMUM.

And they wanted to know if *we* could help them do it.

Brenton: Well, with your excellent track record at *Personal Finance*, I can see why subscribers would seek out your advice.

But come on… isn't it overly optimistic to think you could consistently find companies with the potential to multiply investors' money ten times over… or even more? All in just a year or two?

With over 2,400 stocks listed on the New York Stock Exchange alone… and about 4,000 tracked on NASDAQ… isn't finding the stocks with the huge potential you're talking about like finding a needle in a haystack?

Jim: Well, that's what I thought when I started working on *Radical Wealth* a few years ago.

I knew it would require time… effort… and expertise to uncover the true diamond-in-the-rough gems offering exponential gains.

To do this right, I knew I would have to pinpoint trends…

Hunt for companies that were disrupting the marketplace… dive into financial statements… analyze reams of data… interview CEOs and company insiders…

Even uncover nuggets of intelligence hidden in investor conference calls.

Then I'd have to take all this information — literally thousands of hours of accumulated data — interpret it and identify those companies that had the best potential of booking 1,000% or better gains over the next year.

Obviously, with the amount of work involved, this was going to be a Herculean task.

I knew it was something I couldn't do alone.

That's why I assembled not one… or two… or even three top-notch investment experts to be on my team.

Counting me, we have eight financial gurus — each one an authority in their own field of investing — who have come together to work on the *Radical Wealth* team.

Brenton: That's amazing! I can't recall a time when so many investing experts have joined forces to collaborate on a single project. What can you tell us about them?

Jim: I'm thrilled to report they're all heavy hitters. Some of them are names investors might already be familiar with like…

Dr. Stephen Leeb… Steve's our reliable "no B.S., tell-it-like-it-is" commodities master. Nobody beats Steve when it comes to spotting trends that lead to huge market shifts in gold, silver and scarce resources.

His forecasts are so prized he's a regular guest on *Fox News, Bloomberg,* and *CNN*.

But it's not just profitable resource stocks Steve hunts down.

As you see here, his string of recent triple-digit winners runs the gamut of industries…

Randgold Resources (GOLD)	105.2%
Shaw Group (SHAW)	102.7%
Apple (APPL)	167.0%
Alexion Pharmaceuticals (ALXN)	370.0%
Biogen Idec (BIIB)	244.9%
Sabesp (SBS)	135.0%
Amazon.com (AMZN)	140.3%
Matthews Pacific Tiger (MAPTX)	159.4%
Jensen Quality Growth J (JENSX)	101.7%
Qualcomm (QCOM)	113.3%
FEI Company (FEIC)	265.3%
Sempra Energy (SRE)	110.0%
TOTAL	**2,014.8%**

Followers of his research could have bagged some incredible gains…

Like 105% with Randgold Resources… 102% from Shaw Group… 167% on Apple… 244% with Biogen… 370% from Alexion Pharmaceuticals. The list goes on and on.

Brenton If you'd invested in each of these recommendations, you'd be up a total 2,014%.

I can absolutely see why you'd want Steve on your team targeting ten-fold gains. Who else did you recruit?

Jim: Well, there's **Jim Fink.** I wanted a timing expert on our side who could help investors bring in huge gains *in a very short time*.

Someone who knows how to read the hidden signals the market gives off and can react on a moment's notice.

In fact, Jim's become a legend with his fast-paced trades that hit their target so accurately… *he's like a gunslinger from the Old West*.

In the last year alone, he's had 31 triple-digit winners. Take a look at some of the explosive profits he's racked up… many in just a few days or weeks.

Regneron Pharmaceuticals (REGN)	**138.1%**
Goodyear Tire & Rubber (GT)	**100.0%**
Akamai Technologies (AKAM)	**122.2%**
Las Vegas Sands (LVS)	**100.0%**
Pepsi Co (PEP)	**118.0%**
Western Digital (WDC)	**122.2%**
Dick's Sporting Goods (DKS)	**100.0%**
NetEase (NTES)	**108.3%**
Apple (AAPL)	**111.8%**
Coach (COH)	**108.3%**
CarMax (KMX)	**122.2%**
eBay (EBAY)	**130.0%**
Anadarko Petroleum (APC)	**119.5%**
Garmin Ltd. (GRMN)	**100.0%**
Netflix (NFLX)	**108.3%**
TOTAL	**1,708.9%**

He made 138% with Regeneron Pharmaceuticals… 100% with Goodyear Tire… 118% on PepsiCo… 122% with CarMax… 119% with Anadarko Petroleum… 130% from eBay…

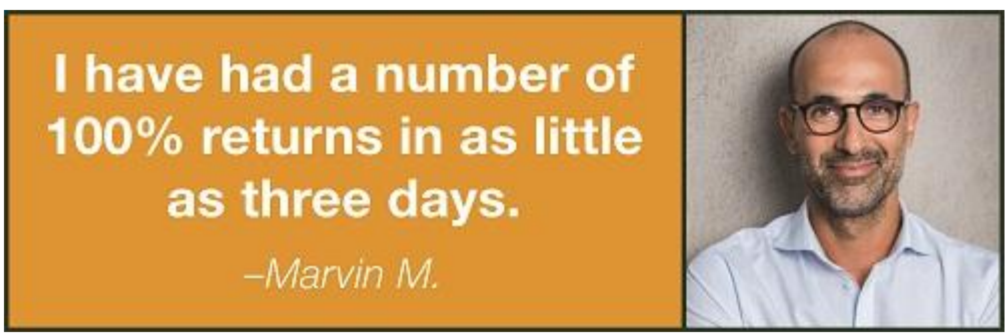
All told, this list shows 1,708% in total gains.

And remember, this is just a *partial* list of the triple-digit winners Jim's racked up in the last 12 months.

Brenton: Think about that for a second. If you put a mere $1,000 into each of these trades, you'd be sitting on over $18,000 in profits right now. Bump it up to $5,000 per trade and you'd walk away with over $90,000 in profits.

Jim: To be clear, Jim has typically focused on making 100% in just a matter of days. And he's pretty darn good at it, as you can see. There's no telling the size of the gains he can deliver when he's targeting 1,000% gains…. and has months to do it.

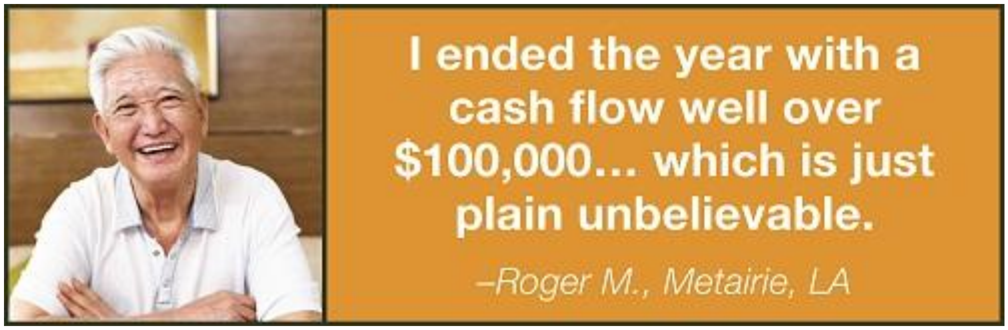
One of Jim's loyal followers, Marvin M., recently told us he's had a number of huge returns… in as little as three days.



Nicole A. reports Jim's trades helped her achieve a staggering annualized return of 14,852%!

And for anyone who doubts it's possible to make safe six-figure gains in just one year…

You better talk to Roger M. of Louisiana. Following Jim's recommendations, he ended the year with a cash flow well over $100,000.



Now as amazing as Steve Leeb and Jim Fink are, I knew I also needed the talented **Linda McDonough** on our team.

She's a former hedge fund analyst who's a pro at "behind-the-scenes" investigative analysis.

She's worked for the uber-wealthy like billionaire George Soros, the nineteenth-richest man on the planet. I knew I could use her skills to detect the stocks on the verge of breaking out due to events few others can identify.

Brenton: I've seen Linda's record. Her stock picks have been on fire.

Jim: That's right. In the past 20 months, Linda has delivered gains of 1,358%…

That's good enough to grow $10,000 into $145,800.

And it's thanks to double and triple-digit winners like these:

V.F. Corp (VFC)	**60.0%...** ***in 2 days!***
V.F. Corp (VFC) (again)	**79.6%...** ***in 19 days!***
Acuity Brands (AYI)	**326.0%...** ***in 9 days!***
Novartis AG (NVS)	**75.0%...** ***in 22 days!***
The Chemours Company (CC)	**142.0%...** ***in 3 days!***
Aecom (ACM)	**70.4%...** ***in 1 month!***
Mueller Water (MWA)	**82.0%...** ***in 5 days!***
PRA Health Sciences (PRAH)	**56.0%...** ***in 1 month!***
Supreme Industries (STS)	**250.0%...** ***in 1 month!***
Summit Materials (SUM)	**135.0%...** ***in 2 days!***
Old Dominion Freight (ODFL)	**82.0%...** ***in 13 days!***
TOTAL	**1,358%**

She scooped up gains of 250% from Supreme Industries… *in just one month*.

It took her *a mere 3 days* to bag a 142% winner with The Chemours Company.

And she really hit the jackpot with Acuity Brands… *up 326% in just 9 days*.

Like Jim Fink, Linda knows how to hunt down super quick 100% gains. I'm positive she'll be every bit as good (if not better) at the 1,000% winners… now that she has months to do it.

And believe me when I say Linda's current subscribers are thrilled with her results. They've been raking in tons of profits with her recommendations.

I'm talking about folks like Frank Ledbetter from Coral Gables, Florida who told us thanks to Linda he booked just over a 200% gain.

Retired school teacher Melanie Wright was amazed with a 52% winner she banked in less than two months…

And Jason D. let us know he even saw his gains approaching 2,880% per year…

Brenton: Linda's track record is nothing short of amazing. I can see why she's such a valuable addition to a team whose sole focus is to generate radical wealth.

Jim: That's right, Brenton. But as much as the *Radical Wealth* team shoots for the moon with our 1,000% profit goal, I know the importance of keeping safety in mind as well.

Ari Charney

That’s why I convinced **Ari Charney** to join the team.

Few strategists can touch the extraordinary profits and peace of mind Ari brings to investors with his income strategies.

In fact, as we speak, Ari has **SEVEN** safe-haven, long-term stocks in his portfolio with total returns of 1,000% or better.

And to round out our *Radical Wealth* team, I brought in three more experts…

Robert Rapier

Robert Rapier is our in-the-trenches oil and gas pro with 20 years experience working for companies like ConocoPhillips. Now he travels the world for us scouting energy companies with the potential to bring investors gains all the way up to ten-times their money… or more.

John Persinos

John Persinos focuses on the hottest trends in technology. Recently, he's helped readers bag profits of almost 100% on Silicon Laboratories… and 288% on YY Inc.

And then there's **Scott Chan.** He's our SEC filings expert. His highly profitable strategy taps into the inner-workings of the world's biggest hedge funds… racking up gains of 101.4% and 378.4% in just a matter of months.

Scott Chan

Add it all up and the experts on our *Radical Wealth* team have a combined 170 years of investing experience in a wide range of financial markets and strategies.

It's this kind of know-how we absolutely have to tap into if we're going to deliver investors 10 times their money in just one year.

Brenton: It sounds like you've built a fabulous team, Jim. This is literally a brain trust of the top investing minds on the planet.

But I also have to say I'm a little concerned. I mean — correct me if I'm wrong — but herding cats might seem easy compared to herding such a diverse team of investing experts.

Jim: That’s true, Brenton. And I guess that’s where you could say I come in. I’m a “big picture sort of guy.” I oversee the work of the entire team. My specialty is bringing clarity to situations like this.

You see, in my 30-plus year career, I’ve managed over $50 million in assets. I’ve executed trades in excess of $5 million. I even founded my own private investment banking firm.

I know what it takes to bring a team of passionate, dedicated and yes, *opinionated*, investment experts together to focus on a single, overriding goal.

Brenton: OK, so you assembled an A-team of financial experts to work with you on *Radical Wealth*. What did you do next?

Jim: Well, I threw down the gauntlet and challenged them to do something unheard of in the financial publishing industry…

I told them we needed to do the research and testing to prove we could effectively predict huge market moves…

The kinds that result in a company’s share price surging 1,000% or more…

Enabling investors to multiply their money by ten… fifteen… even twenty times or more.

I told them we needed to find the common thread that works across all industries and markets… to consistently deliver ten times your money returns.

And now… after a combined 32,000 hours of work dedicated to studying real market data over the last two years…

After spending millions of dollars in salaries, databases and specialized market intelligence software…

After scouring the markets for trends nobody else is noticing…

After crunching the numbers and scrutinizing thousands of corporate documents and financial statements…

And after talking directly to some of the world's most influential CEOs and corporate insiders…

We're finally ready to make public the results of our *Radical Wealth research*.

Brenton: You've prepared a few charts to give our viewers a sneak peek at some of the astounding results you and your team have uncovered.

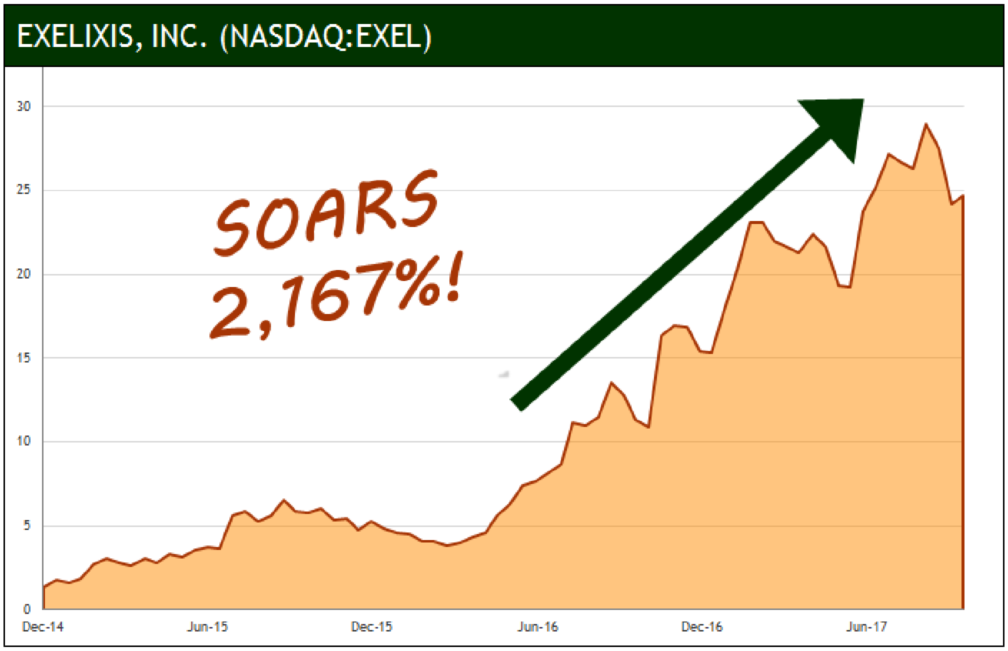
Jim: That's right. Using the system we discovered during our research, we've proven that investors could have taken even small amounts of money…

And consistently and easily turned it into windfall paydays.

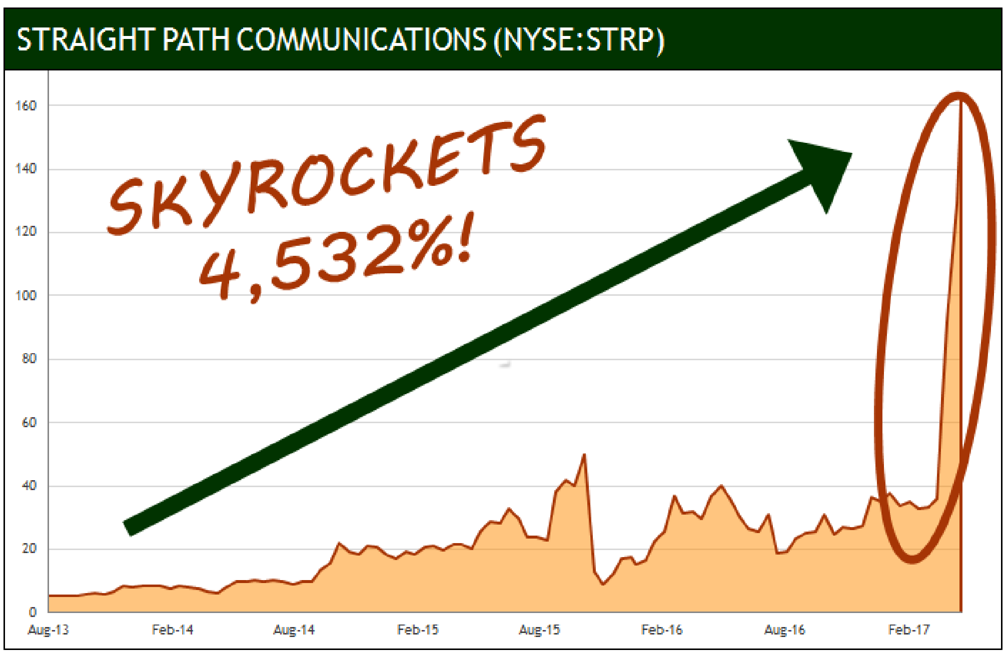
What we've found is that when a company meets a set of four indicators — which I'll share with you in just a moment…

It's a tip-off they are on the cusp of exponential gains like…

Exelixis, Inc., which shot up 2,167%… in a little over two years.

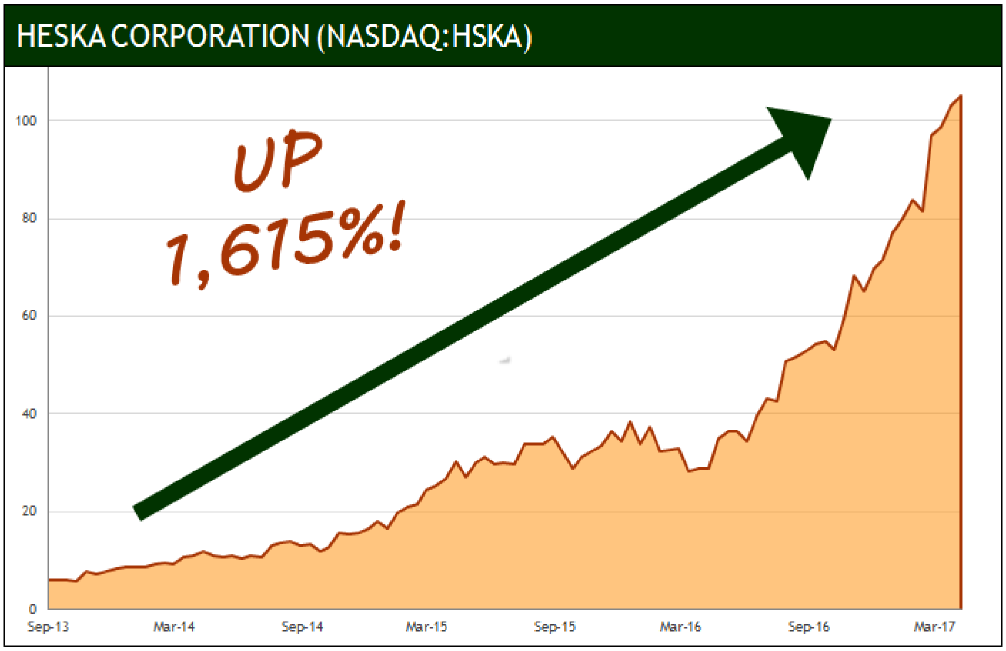


Straight Path Communications skyrocketed 4,532%.

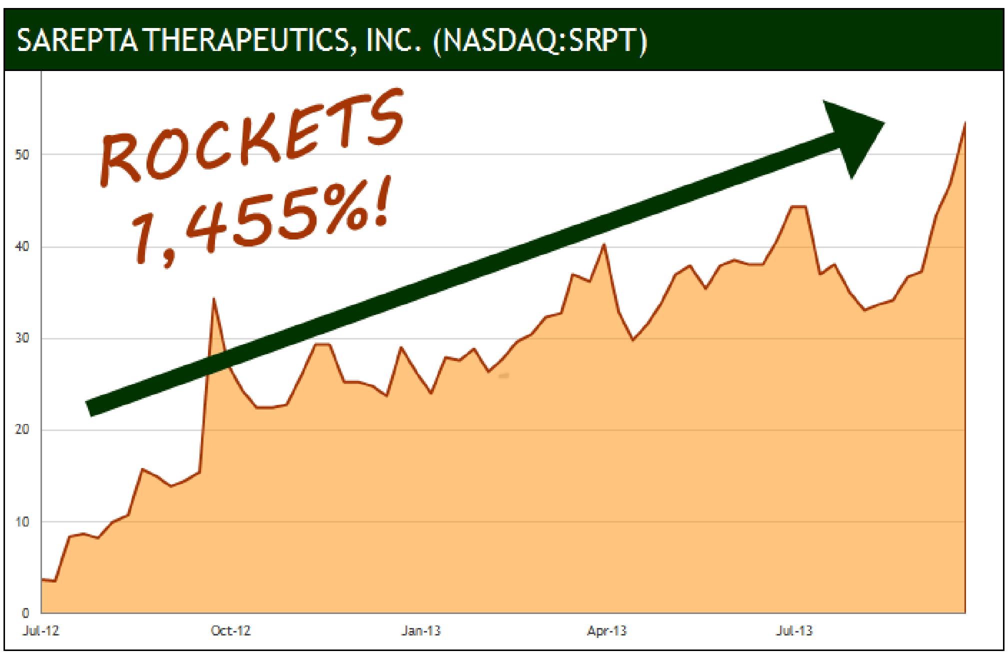


And as you can see from this chart, a huge portion of that growth happened ***in less than six months.***

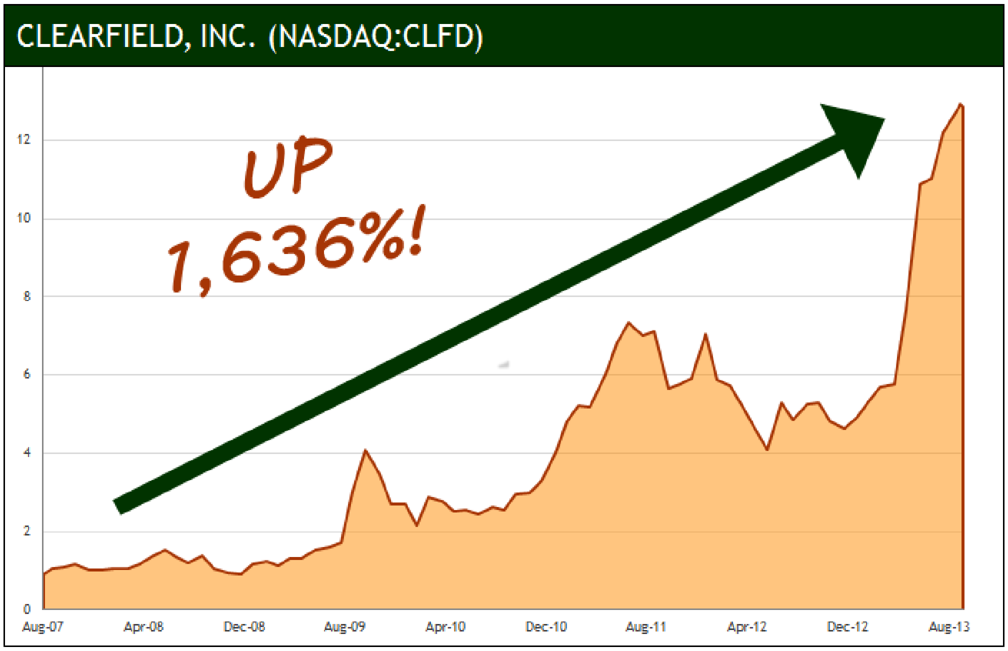
Heska Corporation soared 1,615%… most of the increase occurring in about a year.



While Sarepta Therapeutics jumped a phenomenal 1,455%… in a little over a year.



Clearfield Inc. gained 1,636%…



And Garibaldi Resources catapulted a jaw-dropping 3,958%… ***in only 4 months***.

If you would have put just $10,000 into each of these investments, you could have walked away with $1.6 million.

Again, we're talking about the potential for vast, radical wealth.

Brenton: Well, I have to say I'm impressed, Jim. Your *Radical Wealth* team clearly has uncovered something with the potential to offer investors returns unlike any the financial world has ever seen.

Can you tell us more about how your team is able to forecast which companies are poised to make these astronomical gains in such a short time?

Jim: Sure, it's all based on the breakthrough system my team has developed. In fact, we have a name for it — *David versus Goliath investing*.

Brenton: Wait a second… hold on, Jim… did I hear you right? Did you say *David versus Goliath*? Like in the Bible?

Jim: Yeah, I know, it's an unusual metaphor. But it's actually pretty accurate.

It's one the team and I latched onto to describe a fascinating phenomenon that happens in the markets. It helps you accurately predict *which* companies are most likely to make huge share price leaps… *long before it happens*.

Brenton: OK, now you've got me intrigued. Tell me more…

Jim:

Well, with our system, you're looking for the "David" companies.

A lot of folks would call them underdogs. But we see them differently. That's because they're disruptive.. nimble… and absolutely primed for spectacular returns.

What you don't want are the "Goliath" companies. These lumbering giants are already on everyone's radar. Their footprint is huge and every move they make rumbles across the media headlines like a freight train. There is absolutely no surprise in anything they do.

Brenton: So, Goliath companies are the ones we all know about… like AT&T or Walmart or Intel. But I thought these were the steady, reliable companies everyone should have in their portfolios?

Jim: Don't get me wrong, I'm not saying Goliath companies don't have a place in a diversified portfolio.

I own stock in large companies and we recommend quite a few in *Personal Finance*.

And I'm certainly not saying that all large companies are evil giants that need to be slayed by smaller companies.

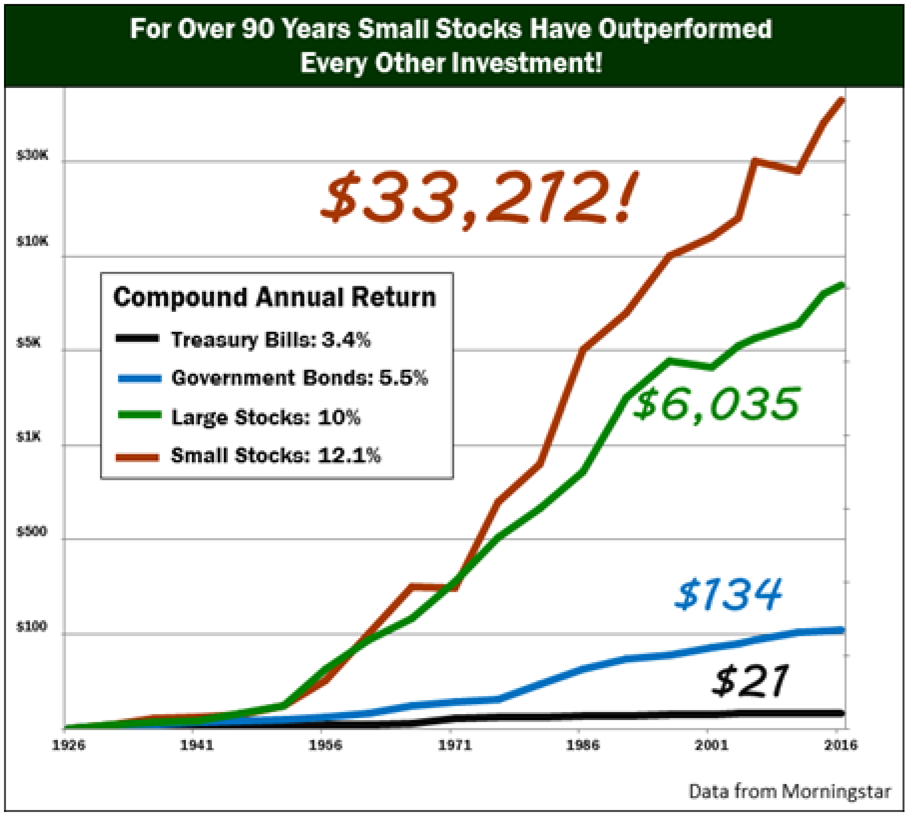
But remember, our goal with *Radical Wealth* is to generate ***huge amounts of wealth as quickly as possible*****.**

What I call "generational wealth." The kind of wealth that could not only keep you comfortable throughout your life…

But could also be your family's legacy for generations to come.

Believe me when I say the best, fastest and most reliable way to generate that kind of wealth is with the smaller "David" companies… and not the "Goliaths."

And it's not just my opinion… it's historical fact. Take a look at the following chart:



This represents the growth of a single dollar over 91 years, from the beginning of 1926 through the end of 2016.

In this scenario, if you had invested a dollar in Treasury bills in 1926 and held on, with all gains reinvested, you would have had $21 by the end of 2016.

However, that same hypothetical dollar invested in government bonds would have grown to $134.

That's because the compound annual return for Treasury bills was 3.4% during that time period and 5.5% for government bonds.

But take a close look at what happens to that dollar when invested in a basket of large-company stocks… the ones we're calling "Goliaths"…

Brenton: Wow, that dollar could now be worth $6,035!

Jim: Exactly. That's because the compound annual return of large companies was about 10%… well beyond the paltry single-digit performance of T-Bills and bonds.

But that's *nothing* compared to what could have happened had the dollar been invested in a basket of *small-company stocks*… the ones we're calling "Davids."

It would have grown to an astonishing $33,212.

That's because over the past 91 years, the typical small-company stock has returned an annualized 12.1% — an average of two percentage points per year MORE than the typical large-company stock.

Brenton: So, let me get this right…

Every $1 invested in large companies would have returned $6,035… while every $1 invested in small companies would have returned $33,212?

Jim: Correct. Shares in small companies — also known as small-cap stocks — historically far outperform every asset class.

Hands down small companies beat Treasury bills… government bonds… even large-company or large-cap stocks.

Brenton: With undeniable historical proof like this, I can see why your *Radical Wealth* team is zeroing in on small-company stocks.

Jim: But hold on, Brenton, I haven't told you the best part yet.

Once we realized we needed to focus on the small David companies…

Our team *really* kicked into high gear.

What we uncovered leads us to believe we can ***far outpace*** even that amazing number from small cap stocks…

Simply by using the four "David versus Goliath" indicators we developed to pinpoint those stocks that have the best chance of returning 1,000% gains in a short time.

I'll tell you more about those indicators in just a moment. But first, let me tell you what else we uncovered during our historical analysis…

We dug into the data and uncovered 13 "David" stocks that went up

1,000% or more in 2015…

51 that rocketed over 1,000% in 2016…

And 65 that catapulted 1,000% or more in 2017.

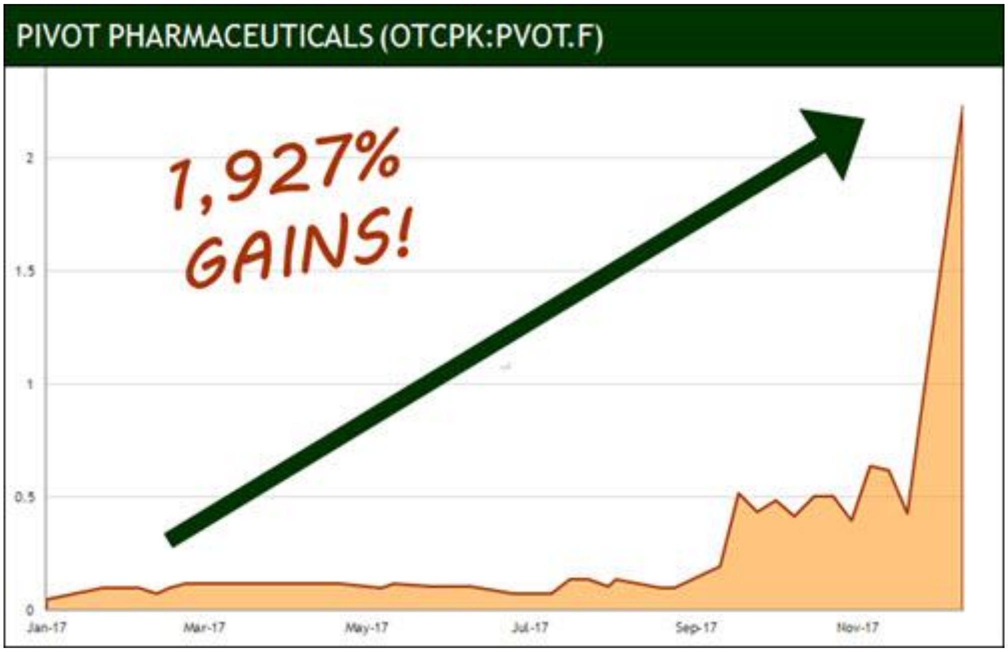
Brenton: It sounds like the momentum is growing *FAST* for big winners in small stocks.

Jim: That's what our research shows.

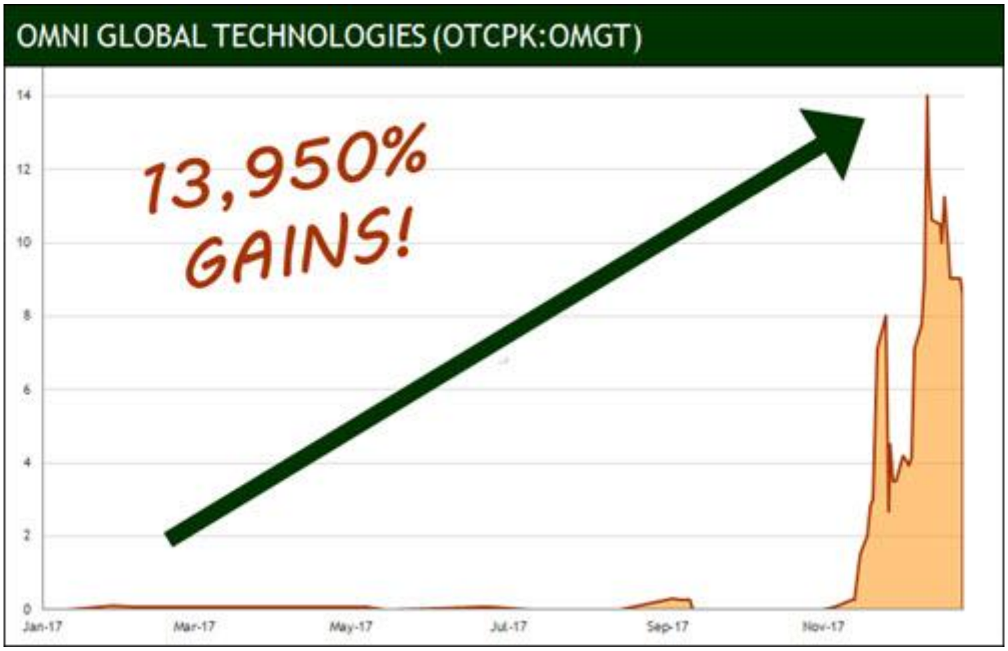
Brenton: Can you give us additional examples of stocks your team has found?

Jim: Absolutely.2017 was a banner year for mega winners in small company stocks.

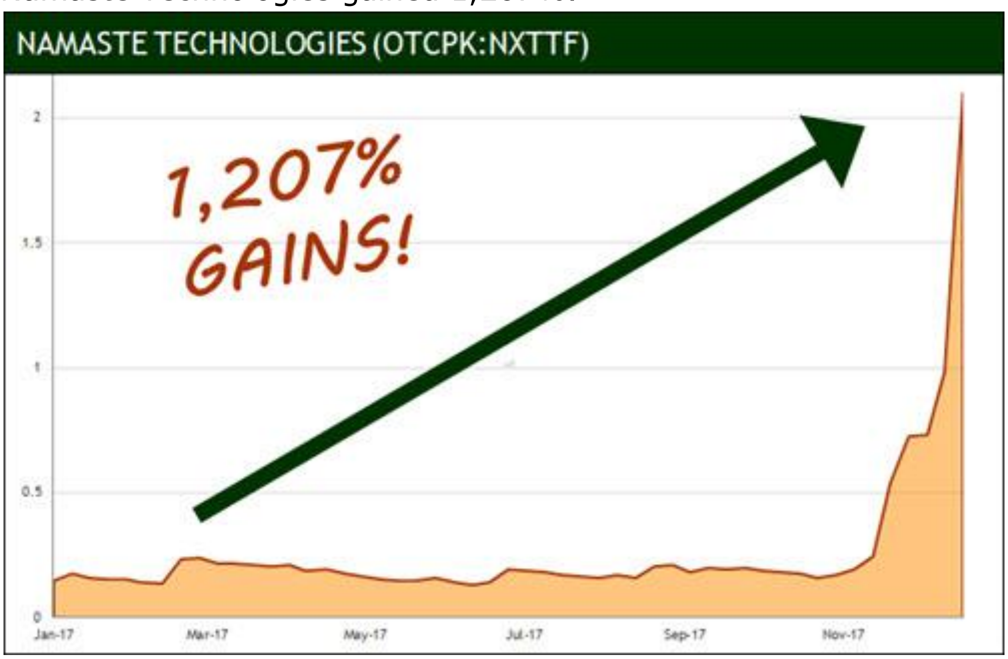
Pivot Pharmaceuticals, for example, made an approximately 1,927% gain.



Omni Global Technologies spun off an enormous 13,950% gain.



Namaste Technologies gained 1,207%.



Propel Media popped 2,500%.

Gravity Company surged 1,644%…

While Freedom Holding Corporation made a 4,526% gain.

Any one of these could have earned investors windfall wealth.

For example, just a small fraction of a typical investor's account invested in Freedom Holding…

Let's say, $10,000… would now be worth around $452,000… in well under a year.

Brenton: And your team found 65 of these 1,000% or more winners just in 2017? That's five to six chances to grow your money tenfold every month?

Jim: Yes and no. While 65 small stocks grew 1,000% or more in 2017… not all of them are created equal. As you can see from the charts, some are penny stocks. They are a huge gamble… hard to trade and erratic.

Frankly, you'd have way better odds playing slots or craps in Vegas than you would with these stocks.

These ***aren't*** the kinds of small companies we want to invest in. Certainly not the kind we're recommending with our *Radical Wealth* system.

Fortunately, our thousands of hours of rigorous back testing have proven there are plenty of safer opportunities each year for investors to make 1,000%.

Plus, our four David versus Goliath indicators help us identify and stay far away from unsound companies…

Guiding us to make as much money as possible with as little risk as possible.

Brenton: So, what you're saying is your *Radical Wealth* team has developed a system for pinpointing rock-solid stocks on the verge of making ten-fold leaps. Can you tell us more about your four David versus Goliath indicators?

Jim: Definitely. The key to our indicators is they help us accurately predict *which* companies are most likely to make huge share price leaps… *long before it happens*. They can get quite complicated and technical. But for our summit today, I'll summarize each and show you some quick examples.

We call our first one the "Industry Rebel" indicator.

Similar to David who was a rebel taking on the giant Goliath… we look for small companies ready to shake up the status quo in their industry.

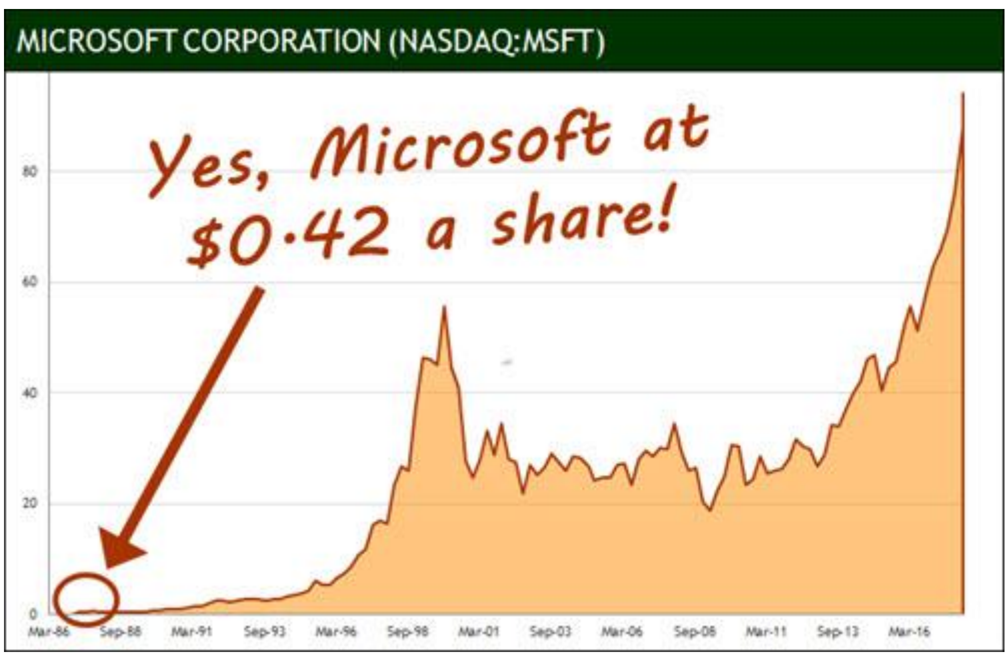
Brenton: You mean… like what Amazon did for online shopping…What Microsoft, Cisco and Dell did for computers…

What Wal-Mart did for retail…

And what Apple did for phones?

Jim: Yes. And remember ALL the titan companies you just mentioned started out as upstarts that initially traded at a tiny fraction of where they are today. At one time you could have purchased a share of Amazon for $1.40 and sold for $1,402…

Microsoft for under a buck and sold for $88…



Or Apple for a paltry 26 cents and sold for $176.

What they all had in common was that at one point they were revolutionary young companies. They were about to enter their most explosive growth period… making them stocks capable of impressive ten-fold moves in a short period of time.

Most importantly, what they were doing was unprecedented in their industries.

And this is key… because an investment-worthy small company MUST be able to disrupt their industry in such a way as to create new demand… and a large market for their products or services.

You need that large potential market if the stock is to climb 1,000% or more.

Brenton: And your team of 8 investment experts knows how to find those David companies that are genuine Industry Rebels?

Jim: Absolutely. Whether it's Jim Fink analyzing reams of financial data to separate the winners from the losers…Or Linda McDonough hitting the phones to grill suppliers of companies she follows to understand demand trends…

Or Robert Rapier putting boots to the ground to unearth the next small resource company on the verge of striking it big…

Our over 170 combined years of investing experience ensures our team has what it takes to uncover those unique upstarts…

That could create millionaires out of shareholders who get in early.

In fact, we've put together an investment dossier detailing our top five picks — each of which easily could be on the verge of skyrocketing 1,000% or more.

It's called *"Radical Wealth Investing: 5 Ways to $100,000 in Profits."* I'll tell you more about it in just a minute.

Brenton: OK, so identifying Industry Rebels is your first indicator. What's the second?

Jim: **We call Indicator #2… Exhibiting Nimbleness.**

We all know the marketplace can be brutal… especially if you're a start-up with a lot to prove.

You can have a great idea… and a great product or service… but if you fail at the execution or can't recover when setbacks come your way — which they inevitably will…

Then your company is toast.

You see, small companies that have the potential to rake in 1,000% returns *have to be agile just to survive*.

Now if you remember back to the Bible story, David didn't have just one stone at his disposal to slay Goliath… *he had five*.

Fortunately, he only needed one stone.

But the fact that he had extra stones… backups if you will… just in case something went wrong the first time around…

Is very similar to what we want to see with small companies before we put a dime into them.

You see, we want to make sure when the proverbial stuff hits the fan, these young companies are on sure footing. They need to have the resources to recover quickly.

Brenton: That makes sense. What kinds of things does your team look for?

Jim: We look for strong management… good leaders at the helm who can change course quickly if needed. Also, we make sure the company's growth doesn't outpace its resources. They need to have money in the bank to survive lean times… and to take advantage of new opportunities.

So we review debt and working capital ratios to spot good cash flow.

We dissect financial statements for near-term potential to grow revenues, earnings, or both at more than 100% per year.

Plus, we look for future growth opportunities. Are they one-hit wonders? Or do they have a fertile pipeline of new innovation that can propel growth for years to come?

Brenton: Sounds like your team does a ton of research.

Jim: We have to. The *only* way to find those companies capable of multiplying investors' money by ten… fifteen… even twenty times or more…*Is to run them through a virtual financial stress test*.

If they're not agile… we throw them back and look for another company.

Brenton: OK, so far we have Industry Rebel and Nimbleness. What's the third indicator?

Jim: **We call it the "No News is Good News" Indicator.**

We love it when our underdog "David" companies are ignored by the mainstream media and industry analysts.

We search out companies that aren't on any hedge fund manager's radar and have very little institutional ownership.

Brenton: Well, that's a bit odd. I thought getting good analyst and media coverage helped push UP stock prices?

Jim: Sure, that's absolutely true in the mid to late innings. And that's the time when most people jump in… well *after* the truly exponential gains have already happened. They jump in after the media talking heads and analysts give the stock a glowing review.

And after big hedge fund managers make their moves to lock in millions — if not billions — of dollars in shares.

By the time the average investor gets in, the run-up is already well under way. They might count themselves lucky if they get a 10% or 20% gain.

But remember, that's not good enough for our *Radical Wealth* team.

We're on the hunt for ten-fold gains of 1,000% or more. You've seen for yourself in all the charts I've shown today… you have to get in way ahead of the pack for those kinds of gains.

Brenton: So, in this case the lack of media coverage and hedge fund ownership is *an advantage* to the average investor looking to invest in small companies. But I still don't understand *why* the media and big institutions ignore small caps… especially when history shows they far outperform T-Bills, bonds and large caps.

There's clearly a lot of money to be made in small companies.

Jim: Well, the truth is most fund managers *can't* invest in small companies. These managers might have hundreds of millions or billions of dollars to invest. That kind of a stake in a small company might amount to a 20% or more ownership.

Such a huge ownership by one fund in a single company would trigger SEC regulations, which make it difficult for funds to establish positions of this size.

So, funds tend to ignore small companies — even ones with great prospects that could easily bring in more profits than the well-known Goliaths.

For example, legendary investor Warren Buffett bemoans the fact his Berkshire Hathaway misses out on attractive small company opportunities.

Here's what he has to say:

"The universe I can't play in [i.e., small companies] has become more attractive than the universe I can play in [that of large companies]. I have to look for elephants. It may be that the elephants are not as attractive as the mosquitoes. But that is the universe I must live in."

And it's here, Brenton, where the small investor has a *tremendous advantage* over Warren Buffett.

His hands are tied… strict bylaws govern what he can and can't invest in. That puts the lucrative small company market out of his reach.

But that's *not* the case for the individual investor. We can take advantage of all kinds of profitable small company opportunities.

Brenton: That's certainly exciting news for our viewers.

And what you're telling us also explains why the media doesn't cover small companies. They're focused on the moves the big fund managers are making, so they don't devote much effort to reporting on the smaller companies.

But that brings up the question of *how* you're able to uncover the best small companies to invest in if they're ignored by everyone else?

Jim: Again, that's why we have ***a team of 8 investment gurus*** devoted to the *Radical Wealth* effort.

It takes ALL our combined efforts…

Including tapping into our industry contacts and our ability to analyze reams of data…

To discover those small-cap gems with the potential for ten-fold gains.

In fact, our team's "super sleuth," Linda McDonough, just uncovered an exciting small company on the verge of shaking up not one… but three… major industries.

This company could shoot up 2,000% by our calculations.

That's enough to turn every $10,000 sliver into a $200,000 windfall.

Brenton: OK, in a moment you'll share with us some behind-the-scenes info about Linda's discovery.

Plus, you'll give our viewers *exact* instructions on how they can get in on the ground floor with this opportunity.

But before we dive into that, let's discuss your fourth and final David versus Goliath indicator.

Jim: **Our last indicator is "The Temporary Value Disconnect."**

As we discussed, David companies often have little analyst coverage and garner little to no respect from Wall Street. This lack of attention increases the chance that these small-company stocks aren't priced correctly.

You see, these can be fundamentally very strong companies, but for a time their stock price doesn't reflect that.

Brenton: So the analogy here is that David companies are worthy opponents to the Goliaths… but Wall Street just hasn't caught on yet.

Jim: Yes, and it's this temporary disconnect that represents a *tremendous* *buying opportunity* for the individual investor.

The Davids that our *Radical Wealth* team homes in on aren't just industry disruptors…

They often have competitive business models and tremendous future earnings potential.

Brenton: So it's a window of opportunity for investors to buy in while prices are low and Wall Street remains clueless. But I imagine it's a pretty small window?

Jim: Sometimes it is. That's why our *Radical Wealth* team uses a wide range of metrics to pinpoint the right time to enter any given trade.

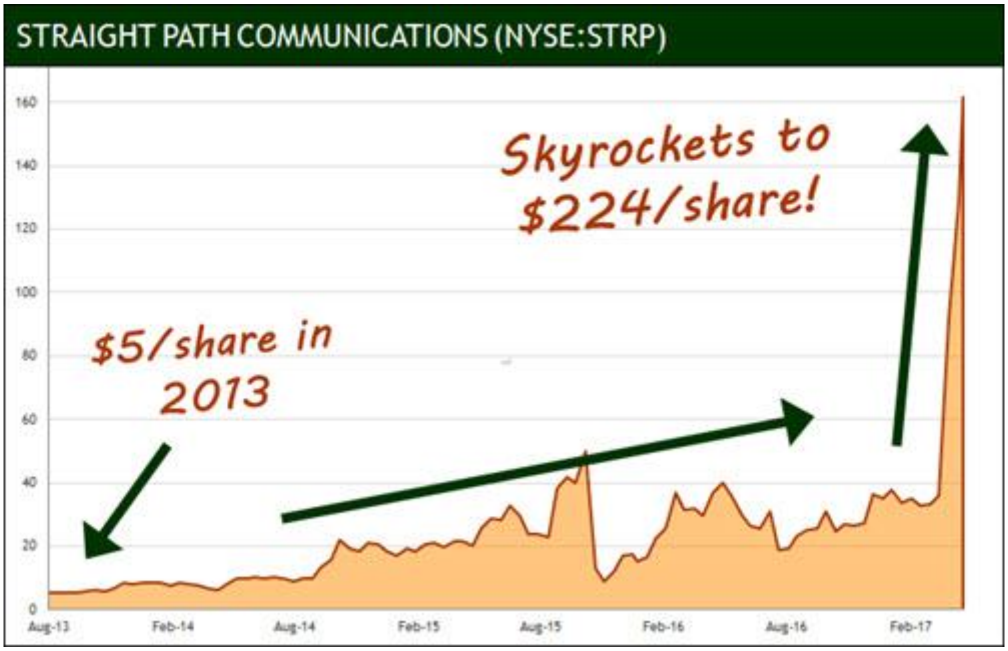
Let me show you just how quickly some of these trades can develop.

Earlier, we mentioned Straight Path Communications, which skyrocketed 4,532%.

It's a company the *Radical Wealth* team identified during our historical analysis as a prime example of a temporary value disconnect.

Let's take a closer look at the chart.

Brenton: It looks like Straight Path starts at a low of $5 a share in 2013… before trending up nicely from January 2016 to April 2017.



Then the price goes vertical practically overnight… from about $35 a share to $224 in just a few weeks. Something must have happened!

Jim: What happened was two Goliath companies — AT&T and Verizon — entered into a bidding war to acquire Straight Path.

Both companies knew Straight Path owned a hugely valuable asset… the FCC wireless licenses needed to power 5G, the next generation of high-speed wireless service.

Brenton: I've read 5G is expected to be critical for all kinds of future technology… like cloud computing and artificial intelligence.

Even driverless cars will need to rely on 5G.

Jim: That's right. A recent study predicts 5G-enabled goods will boost worldwide growth by **$3 trillion dollars** in less than 20 years.

That's why Verizon was willing to shell out a whopping $3.1 billion for Straight Path, a company a few weeks earlier had a market cap of just $450 million.

Brenton: And that's why the stock jumped from $35 a share to $224 in mere days?

Jim: Yes. And over about three years, Straight Path catapulted 4,532%.

Meaning a $10,000 stake could have skyrocketed to over $453,000.

But here's the thing…

While it was trading for just 5 bucks… this company had a virtual lock on some of the most valuable telecommunication assets in the United States…

And it was *STILL* practically ignored by both the financial media and the hedge funds.

Most media and analysts didn't even report on the 5G licenses until *after* the potential acquisition hit the rumor mill.

Brenton: And by then it was too late. The stock was already skyrocketing.

Jim: Yes, and that's why our temporary value disconnect is such an important indicator.

It represents that brief window of opportunity that can turn thousands of dollars into hundreds of thousands… or even millions.

Brenton: OK, so you've shown us there was a clear disconnect between how Wall Street valued Straight Path and what titans like AT&T and Verizon were willing to pay to acquire the company.

But is it just companies poised for acquisition that demonstrate a value disconnect? Or are there other situations where your indicator applies?

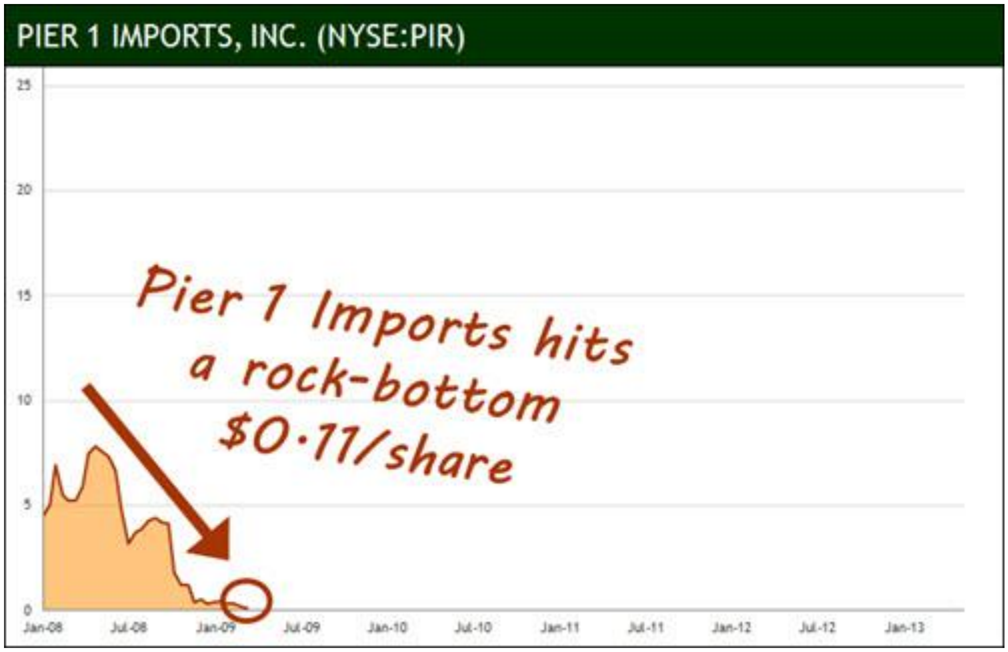
Jim: A value disconnect can also happen to established companies.

Ones that aren't young, but are forced to re-tool because of major marketplace disruptions.

So this means we aren't limited to just startup companies. We also research a whole slew of established companies on the rebound.

And the wealth-building opportunities in this area can be extraordinary.

Let's take a quick look at what happened to Pier 1 Imports…



After the 2008 financial crisis, the company tanked. The housing market was a shambles and nobody was interested in buying furniture and housewares.

By March 2009, Pier 1 hit a rock-bottom 11 cents a share and its market capitalization fell to about $50 million.

Brenton: Am I right in assuming at this point hedge funds had sold the company and the media coverage dried up?

Jim: Right, a lot of them wrote the company off for good. And remember, most hedge funds *can't* invest in small companies because of SEC regulations.

So, they wouldn't touch the stock with a ten-foot pole… *even if it was on the cusp of an enormous turnaround*.

But luckily for us as individual investors, we don't have these restrictions.

We can get in on small companies on the verge of major rebounds.

Brenton: What did your team's back testing on Pier 1 uncover?

Jim: It identified it as a true "David" company — a small company with an enormous value disconnect.

We discovered within a few short years, the company's new CEO had re-energized the customer base.

He cut costs… eliminated debt… bumped up cash reserves and posted consecutive double-digit sales increases.

All while many other retailers were filing for bankruptcy.

It was as clear as a bell the company was on the right track. All you had to do was analyze their quarterly financial statements.

Brenton: The same financial statements the funds and media were ignoring… along with the entire company?

Jim: Exactly. But our *Radical Wealth* team *NEVER* ignores small companies because we know historically that's where the huge winners are.

We *ALWAYS* dive into the financial statements, tearing them apart line-by-line to unlock the indicators that prove a stock could quickly explode… just like this one did.

As you can see, Pier 1 literally came back from the dead. Share price went through the roof…. ***resulting in a massive 22,809% increase*****.**

You could have bought a share of Pier 1 for a mere 11 cents…

And sold for $25.20.

Brenton: **So that means you could have catapulted every $100 into more than $22,800.**

Every $1,000 into $228,000. And every $10,000 into over $2.2 million.

That's astounding!

Even if you had invested just a sliver of your account, you could still end up with windfall wealth.

Easily enough to make a serious dent in your retirement savings… go on a luxury cruise… or fund your kids' college education.

Jim: Yes, this truly shows you the fortune-building power of investing in the right kind of small companies. Now Pier 1 has come down since its monumental highs. But as I said, we're talking about a company with a *temporary* value disconnect. These aren't long-term holdings.

And it's just one of four indicators we look for. But it's one that enables us to get in quickly… make an absolute fortune… and then head for the exits…

Long before Wall Street even has a clue what's going on.

Brenton: It's fascinating to see how your Radical Wealth indicators pinpoint these lucrative trades, Jim. But we're getting to the end of our webinar. Can you give us one last example of a company that demonstrates *all four* of your David versus Goliath indicators?

A company that was a nimble Industry Rebel… that wasn't being covered by the media or hedge funds… with a tremendous value disconnect? One that eventually skyrocketed at least 1,000%?

Jim: Sure. Earlier we mentioned LendingTree. Here's the chart again:

Just recently, the company rocketed 2,476%… going from about $15 a share to almost $402.

You might recall, LendingTree started as one of the original dot-coms of the late 1990s. It acted as a "matchmaker" connecting consumers shopping for home mortgages with multiple lenders offering loans.

At the time, shopping for a mortgage online was a pretty radical notion.

For the most part, home buyers were so overwhelmed with the home buying process, they just accepted their realtor's recommendation on a lender and didn't bother shopping around.

And, of course, the big banks loved this. Without competition, there was little incentive for them to give consumers a better deal.

But LendingTree saw this as an opportunity to disrupt how the mortgage industry worked. Its platform showed home buyers they could save thousands of dollars by using their site to get quotes from multiple lenders.

It effectively put home buyers in the driver's seat and made the banks compete for their business.

Brenton: So, LendingTree was a small company taking on the Goliath banks. Definitely an industry rebel, your first indicator. What about your second indicator, nimbleness?

Jim: Well, this is where LendingTree has really shown its mettle. It survived the tech bust when most dot-coms went down in flames. That's because it had a *real* business model with a *real* service to sell. And after the 2008 mortgage meltdown, it had to reinvent itself *yet again* to survive.

LendingTree figured if Americans liked to bargain hunt for good deals on mortgages, they might jump at the chance to do the same for all kinds of consumer credit products.

So, the company expanded its digital platform to include personal loans… credit cards… home refinance… auto, student and business loans.

Brenton: Well, that seems like a smart strategy. Lots of sites make it easy to comparison shop for airline tickets and hotel rooms… so why not shop for deals on money?

Jim: That's right. People have flocked to LendingTree's new services and the stock has gone to the stratosphere in just a few short years…Turning it from a small company with a market cap of just $175 million to one valued at over $4.4 billion…

It multiplied shareholders' money 25 times over… going from

$15 to an amazing $400 a share.

Enough to turn every $10,000 into a staggering $257,600.

But get this, Brenton…

In the early days when LendingTree was reporting its plans to take on all these new potentially profitable market segments…

And how it was on the cusp of implementing innovations that could turn the entire financial services industry upside down…

Hardly anybody on Wall Street took notice.

Brenton: And there's your third Radical Wealth indicator… a lack of attention from the media and hedge funds.

Jim: Yes, analysts and the media rarely reported on the company. And the hedge funds wouldn't touch the stock. It was simply too "small fry" for them to take a stake in.

Brenton: But not too small for your Radical Wealth indicators?

Jim: It's *exactly* the type of company our indicators were designed to ferret out. To add icing on the cake, LendingTree scores especially well on our fourth indicator, the temporary value disconnect. You see, what made LendingTree unique was that it was well ahead of everyone else in implementing the technology needed to bring comparison shopping for financial services to the masses.

It was making acquisitions and bringing in the right people to do the job…

It was making huge strides quickly, but for years its share price didn't reflect that.

Brenton: And of course, that's the ideal time for investors to dive in… while share prices are still low and well before the news of its success makes it to the mainstream media.

Jim: Yes, and it's that small window of opportunity our indicator pinpoints.

It's the timing indicator that tells us when to pull the trigger on those stocks that could yield investors the 2,476% gain we saw from LendingTree…

The 4,532% we saw from Straight Path Communications…

And the massive 22,809% increase from Pier 1…

Brenton: OK, now I want to be clear all the stocks you've shown us today can be volatile. They can be a rollercoaster ride with huge and rapid swings… both up and down.

Jim: That's right, Brenton. Because of that, investors should be cautious. It's not a strategy for everyone and not something you should bet the farm on. You need to review your own financial situation before investing. That said, if you're *really* serious about getting a ten-fold return on your money… enough to turn every $10,000 invested into $100,000…

All in as little as a year or two at the most…

Then I don't know of a better way than investing in the "David" type companies I've been telling you about today.

In fact, my team and I have already identified **five recommendations**… all of which are lining up to be real fortune makers. Any one of them could bring at least 1,000% returns in the next year.

Let's discuss one we're really excited about.

As I mentioned earlier, Linda McDonough has targeted a rebel company on the verge of shaking up not one… but three… major industries.

It's a producer of high-performance advanced engineered materials used in electrical, electronic, thermal and structural applications.

OK, sounds boring, right?

Wrong!

They're actually a very exciting, cutting-edge company.

That's because they're the *only* company in the U.S. mining a rare earth metal that is revolutionizing the way the products of tomorrow will be manufactured.

This rare metal has so many unique qualities, scientists are calling it "the miracle material."

It's lighter than aluminum… but ***stronger*** than steel.

It easily withstands blazing hot temperatures… and the deep-freeze as well.

And, when combined with other metals, this miracle material makes them stronger.

Brenton: Jim, you said this will change the way products of the future are made. What did you mean by that?

Jim: What I meant is that we're at the beginning of a materials revolution. Listen, the materials of yesterday just aren't going to cut it when we talk about all the demanding technology coming down the pike.

This new technology requires high-performance materials. Stuff that has the strength and durability to withstand extreme conditions. The kind of performance our company's miracle material excels at.

Brenton: Can you give us examples of this?

Jim: Sure, let's start with space exploration. It's no secret that rockets, satellites and space telescopes require materials that can withstand the rigors of space travel.

Well, our company *already* provides NASA with the building blocks used in all these applications and more.

But add in a *new* wave of commercial space exploration and space tourism to the mix…

And our company is set to explode with demand from customers who can't get enough of their space-age materials.

Brenton: But isn't that decades off in the future? I mean… is there really money to be made in commercial space activities *right now*?

Jim: Well, both Elon Musk and Richard Branson seem to think so. Musk has 5,000 employees working at his SpaceX company. They design, manufacture and launch advanced rockets and spacecraft.

His Falcon 9 rocket and Dragon spacecraft deliver cargo to and from the International Space Station.

SpaceX has $12 billion in contracts for over 100 commercial and government missions.

Plus, he's received billions of dollars in private investment capital from the likes of Google, Fidelity and many others.

But here's where things get *really* interesting for our rebel company…

It's *already* an approved materials supplier for SpaceX…

Which means it's in a prime position to expand its fortunes as Elon Musk expands his business into bigger commercial ventures…

Like reusable rockets… planetary mining… Mars exploration… and lunar tourism.

And believe me when I say space tourism is setting up to be a HUGE new industry.

Richard Branson had no trouble getting 500 people to pay up to $250,000 each to take a ride on his Virgin Galactic space plane.

And this is happening fast. It looks like the first flight might be later this year.

Experts estimate the space tourism market will reach $34.5 billion by 2021.

And again, because our rebel company provides materials crucial for space travel, it will definitely gets its share of this multi-billion dollar pie.

Brenton: That's fantastic. Now you had mentioned earlier there were two other industries our David company is shaking up.

Jim: That's right. The U.S. military and self-driving cars. Both industries desperately need cutting-edge materials and they're looking to our company to provide them. They already supply materials used to build fighter jets.

But just recently they snagged *another* contract to produce materials for the Air Force Global Hawk spy plane.

The military has spent at least $10 billion on the Global Hawk program.

And with tensions rising between the U.S. and its rivals, the need for unmanned spy planes — and our company's products — will likely increase in the future.

Our rebel is getting into the self-driving car market in a big way, too. They're a world leader in the technology required to produce the sensors smart cars rely on.

And this is *another* huge opportunity for them. By 2022, the car sensor market is expected to reach $23 billion.

That's what makes this company so potentially lucrative for investors getting in now.

They're a nimble company which does multiple things well… leaving their competitors in the dust.

Brenton: So what kind of profit potential are we talking about here?

Jim: Well, the combined market value for the 3 industries we just discussed — private and government space exploration, the U.S. military and automated car sensors — will soon reach over $793 billion. Obviously, our David company is only after a fraction of this amount.

But the point is they provide crucial materials to many deep-pocketed technology sectors.

They produce and refine a rare metal nobody else in the United States can.

It's a miracle material with unique capabilities that helps make production of space-age products possible.

And as I've shown here, the demand for the miracle material is about to soar.

That's why we're projecting an increase for this company of up to 2,000%.

If our calculations are right, this David company *won't* be a David for much longer.

In fact, we fully expect it to enter the ranks of well-known Goliaths.

And at that point, it will be too late to invest. Most of the big profits will have already been made.

So if you're interested in grabbing your share of up to 2,000% gains…

Enough to turn $10,000 into $200,000…

You'll want to read Linda McDonough's complete write-up where she reveals this rebel company's details…

How it stacks up against our four David versus Goliath indicators…

And most importantly, its name and stock symbol, so you can buy shares while they're still affordable.It's all in our special report, "*Radical Wealth Investing: 5 Ways to $100,000 in Profits."*

Brenton Now I want to let our viewers know this report is something everyone receives who joins our new *Radical Wealth Alliance* service. In just a moment, we'll give you all the details on how you can get your copy of this exclusive report and start your way to 1,000% gains.

But first, Jim, can you give us a quick rundown on the four other profit opportunities in your report?

Jim: Absolutely.

- **Jim Fink** has tracked down a hot technology company which uses artificial intelligence to help businesses get their products and services in front of millions of paying customers.
- **Dr. Stephen Leeb's** recommendation is a sports equipment manufacturer making a splash in a $19 billion market. With a market cap of $680 million, that's a 27-times upside potential

for this upstart firm.

- Energy expert, **Robert Rapier** has his eye on a solar company whose revenues have *TRIPLED* and is now on the verge of conquering one of the biggest solar markets in the world.
- And then we have my personal recommendation — an engineering services company perfectly positioned to hit the jackpot in new contracts from President Trump's proposed **$1.7 trillion** in infrastructure spending.

Brenton: All told there are 5 opportunities for 1,000% or more gains included in your team's report. That's 5 recommendations… each thoroughly vetted by a team of renowned investing experts … that could easily turn $10,000 into $100,000.

For a total of half a million dollars in profits.

That's a ton of money.

Jim: But that's not all. We start out with these 5 initial investments. But then we build our portfolio each month with a brand new recommendation. Within a year the portfolio will include 17 wealth-building opportunities.

Brenton: That's 17 stocks poised to soar 1,000%. If you were to put a modest $1,000 into each of these recommendations, you could end up $170,000 richer… in one year. **Bump that up to $10,000 per investment… and your profit potential soars to $1.7 million.**

Jim: These are absolutely the kinds of results my team expects to achieve with the *Radical Wealth Alliance*. That's because we've spent millions of dollars over the past two years… and a combined 32,000 hours of work…

Studying reams of company data… scouring the markets for trends… interviewing corporate insiders… and doing boots-on-ground research.

We've done all this to develop a system any investor could use starting right now…

To consistently rake in 10-fold gains — *without taking big risks with* *their money*.

And because of the time, expense and effort we've dedicated to the *Radical Wealth Alliance…* we do have one hard-and-fast rule.

And that is… there are no refunds on membership.

Brenton: Well, that's understandable. Unfortunately, there are people who will purchase an investing service, take all the profit recommendations and research, and then immediately cancel the service.

That's certainly not fair to you and your research team.

Nor is it fair to all those who join with the right mindset. Those investors who are serious about growing their wealth and building a better future for themselves and their loved ones.

Jim: And Brenton, it's this exact group of investors we're eager to help with the *Radical Wealth Alliance*. It's the only kind of investing I know of that gives the regular, everyday investor a *HUGE* advantage over Wall Street.

And we've taken it one step better by ensuring it's also one of the *easiest* ways to build wealth quickly.

All the trades we recommend will be simple stock purchases investors can execute using a standard brokerage account.

No gimmicks… no tricky options or buying on margin.

In minutes, you'll be able to place your trades. And then you can sit back and relax knowing your *Radical Wealth Alliance* team is *always* on the alert…

Monitoring current positions and watching out for new wealth-building opportunities.

Letting you know what to buy, when to buy and when to cash out your profits.

Brenton: Jim, I've prepared a deal for all the people who took the time to tune in today. It's our special charter membership to the *Radical Wealth Alliance*. Before I cover that, I want to thank you for sharing with us your David versus Goliath system for creating radical wealth. It's been truly enlightening.

Jim: My pleasure, Brenton. Thanks for having me. I can't wait to meet the folks who sign up for the *Radical Wealth Alliance*.

Brenton: OK, let's review everything you'll receive when you become a charter member of the *Radical Wealth Alliance*…

12 Profit Alerts a Year: Each month, we'll target a new profit opportunity.

It might be a hot play on a natural resource stock about to strike pay dirt…

Or an under-the-radar tech firm on the cusp of skyrocketing…

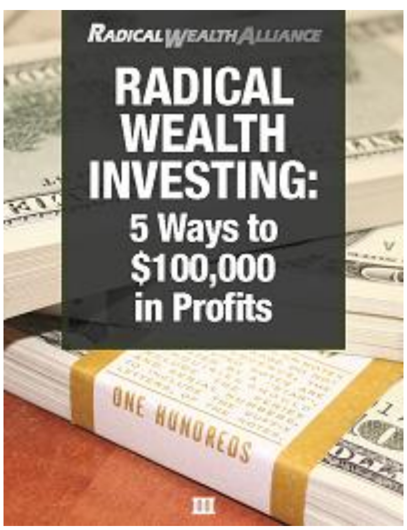
Or a small biotech company days away from releasing a breakthrough drug…

Or even a veteran company on the verge of making a ten-fold rebound.

Rest assured — whatever the trade happens to be — you'll know it's been thoroughly vetted by Jim Pearce and his team of experts…

To have the best potential to quickly and safely bring you 1,000% or more return on your money… ***enough to turn every $10,000 into $100,000***.

Radical Wealth Investing: 5 Ways to $100,000 in Profits — You'll get all the details of our team's top five picks. Get ready for 10-bagger gains with…



The little-known miner that produces a "miracle material" critical for building the products of tomorrow…

The sports equipment company offering 27-times upside potential as it takes on a $19 billion industry…

The tech firm with the breakthrough AI solution that helps businesses access millions of paying customers…

The profitable solar company that just might conquer the biggest market on the planet…

Plus the engineering firm about to get its share of Trump's $1.7 trillion infrastructure jackpot.

Strike it big with all 5 of these plays, and you could pocket a cool $500,000.

Getting Started Guide — This concise guide gives you all the info you need to hit the ground running with your *Radical Wealth Alliance* membership.

In it, you'll find an overview of our small stock investment strategy, guidance on how much and when to invest, plus answers to frequently asked questions.

24/7 access to a private members-only website – You'll get a password and login credentials to our members-only site. No matter where you are in the world, no matter what time of day it is, you will always have access to all archived trade briefings, updates, and the current portfolio.

Monthly interactive chats — Each month we'll invite you to a live online meeting where I'll put one of our analysts on the hot seat.

This is your chance to ask any questions you have about our model portfolio or latest picks and get an immediate answer.

Not able to make it? Don't worry, we'll record the meeting and post it to our members-only website.

Weekly updates — Profit opportunities like the ones the *Radical Wealth Alliance* delivers wait for no one. If you're not up to speed, you risk getting left in the dust.

Which is why we send you weekly streamlined intelligence reports. In them, you'll get a review of our team's thinking on current positions, how you stand to make money from them and step-by-step instructions on what to do next.

Access to Our Radical Wealth Alliance Team — Here's something you'll find unique about the *Radical Wealth Alliance*…

When you join, you'll get *personal attention from our entire team of 8 investing experts*.

We're not like most services which give you access to only one expert.

With us, you'll get the best ideas… the most lucrative investment strategies…

From a literal brain-trust of the world's best stock-picking experts.

So, if you have a question for Jim Pearce… Steve Leeb… Jim Fink… Linda McDonough… Robert Rapier…. Ari Charney…. Scott Chan… or John Persinos…

Or if you have comments about our portfolio…

Or want to share news of winnings you've bagged from one of our recommendations…

Just post it to our Stock Talk message boards, and we'll be sure to reply right away.

And for the questions we can't help you with, you're covered by our…

VIP Concierge Team — If you ever have any questions about your membership, or want to know how to make the most of it, you can call or email your concierge team and they'll be happy to assist you.

And just to ensure you're 100% comfortable with your membership, we want you to rest easy knowing you'll *always* be covered by…

Our "Ten Times Your Money" Guarantee: Join our *Radical Wealth Alliance* as a charter member, follow our analysts' recommendations and you'll have the chance to make 10 times your money… enough to turn $10,000 into $100,000… in the next year.

If we don't give you the chance to make ten times your money in the next year… our entire team of 8 financial experts will work for you for FREE.

You'll receive a second full year subscription to the *Radical Wealth Alliance*… AT NO ADDITIONAL CHARGE.

But honestly, I don't think you'll need to take us up on that guarantee.

Because as you've seen, our team has uncovered the secret to pinpointing companies on the cusp of 1,000% gains.

OK, I'm sure by now you're wondering how much it costs to be a part of our *Radical Wealth Alliance*.

Well, let me start off by saying investors in exclusive hedge funds typically pay upward of *$75,000 a year* for access to the level of research our 8 analysts provide.

It's a fee serious investors gladly pay to repeatedly earn 1,000% gains on their money.

But that's nowhere near what you'll pay today.

Because it's not $75,000 a year.

Or $50,000.

Or $10,000.

Or even $5,000.

Since you're part of a very special group… our charter membership group… we're offering a discount to the first 1,000 people who respond today.

All you'll pay for 12 months of in-depth access to our team's research…

For investments they've screened and rescreened multiple times…

Is $2,495 per year.

That's over 50% off the regular $5,000 membership price.

Now let's think about this for a moment…

Our service **guarantees** you'll have the chance to make 10 times your money.

So if you invest just $1,000 in one of our recommendations, you could turn that into $10,000.

Enough to pay for your membership four times over.

All from just one trade recommendation.

Remember, you'll be getting 17 of these 10-times-your-money opportunities in the first year alone.

And to make sure price doesn't keep anyone from joining the *Radical Wealth Alliance* who really wants to…

I'm sweetening the deal even further.

As a charter member, you'll not only receive a 50% discount today…

You'll lock in that price FOREVER.

In future years, when membership goes to $5,000 (or higher)…

You'll still get your 50% discount.

Something other members won't have… *but you always will*.

Now let's take a quick recap of some of the things we've shown you in today's presentation.

We’ve shown you the research.

By becoming a member of the *Radical Wealth Alliance*, you’re positioning yourself to get in on investments like…

- ✓ Garibaldi Resources which surged 3,958%… in just 4 months.

- ✓ And Pier 1 Imports which skyrocketed an astonishing 22,809%.

We’ve introduced you to our “A” team of investing experts easily capable of multiplying your money ten-fold.

Experts like **Linda McDonough.** You’ve seen her track record…

V.F. Corp (VFC)	**60.0%… *in 2 days!***
V.F. Corp (VFC) (again)	**79.6%… *in 19 days!***
Acuity Brands (AYI)	**326.0%… *in 9 days!***
Novartis AG (NVS)	**75.0%… *in 22 days!***
The Chemours Company (CC)	**142.0%… *in 3 days!***
Aecom (ACM)	**70.4%… *in 1 month!***
Mueller Water (MWA)	**82.0%… *in 5 days!***
PRA Health Sciences (PRAH)	**56.0%… *in 1 month!***
Supreme Industries (STS)	**250.0%… *in 1 month!***
Summit Materials (SUM)	**135.0%… *in 2 days!***
Old Dominion Freight (ODFL)	**82.0%… *in 13 days!***
TOTAL	**1,358%**

She’s posted triple-digit gains in as few as 2 days…

And total returns of 1,358%.

That’s good enough to turn a modest $1,500 stake into $21,870!

There's **Jim Fink.** His track record of winners goes on and on…

Regneron Pharmaceuticals (REGN)	138.1%

TOTAL	**2,014.8%**

Steve raked in gains of 2,014%.

That's good enough to turn every $10,000 into a massive $211,000!

Plus, you've heard from people just like you who have already profited from our team's recommendations.

People like Nicole A. who achieved a staggering 14,852% return!

And Roger M. who boosted his yearly cash flow ***over $100,000…***

And Jason D. who saw a gain of 2,880%…

Now it's *YOUR* turn to join these folks on the path to radical wealth.

If you're ready to kick it up a notch….

If you're ready to achieve outsized profits…

And multiply your money by ten… fifteen… even twenty times or more…

And pocket blockbuster gains of 1,000% or higher.

And you want to do it all in the next year.

Then simply click the button below to get started.

But hurry.

As we've said, this opportunity is limited to the first 1,000 people who respond today.

And, unfortunately, I can't promise you'll ever get another chance to join.

If you do, it won't be at the special charter membership price you'll receive today.

So, please, make sure you don't get locked-out… simply click the button below.

You'll immediately be taken to a secure page where you can review the details on how you could easily and safely make $100,000 in the next year.

And how you could get started immediately with the five opportunities listed in our exclusive report, *"Radical Wealth Investing: 5 Ways to $100,000 in Profits."*

All simple-to-place trades which could earn you ***half a million dollars or more***.

Just click the button below and let's get started creating the wealth of your dreams.

I'm Brenton Flynn. Thank you for reading the ***Radical Wealth Summit*** transcript.
